Last Friday, at Morgan Stanley Dean Witter's Millennium conference in London, First Data management presented an aggressive timetable to introduce new **Internet payment** processing solutions. In early June, 2000 FDC, through **Western Union**, will roll out an Internet Money transfer product called "SettleUp.com." During 3Q/00, management expects to announce major new initiatives that would provide.

2) . . . highlighted three strategic, e-business priorities. For one, enable existing customers to move to e-commerce. Second, expand into adjacent markets such as P2P (**person to person**) and B2B. Third, make venture investments in companies enabling **electronic payments** through new products and services. At current market prices, FDC's investment portfolio approximates \$800 million, 80% of which will be in CheckFree. . . Yclip; 4) Passlogix; 5) MeetChina.com; 6) and Excite@Home.

-For the first time, CEO Duques sketched a timetable to introduce important new **Internet payment** processing products. In early June, 2000, **Western Union** will roll out an Internet money transfer product, called "SettleUp.com." Western Union will distribute this service through all major portals. This service.

English Abstract

A method for enabling two businesses to complete a **transaction** that includes **payment** from one business (the buyer) to another business (the seller). A **payment** enabler operates the money transfer service over a computer network of nodes, such as the Internet. Typically, the buyer and the seller use the money transfer service of the **payment** enabler to consummate a **transaction** that they have arranged over the computer network through a business-to-business **transaction** facilitator that enables businesses to arrange deals over the computer network. During registration with the **payment** enabler, a buyer typically provides information about a bank account from which the seller will be paid, and the seller typically provides information about a bank account for receiving the funds from the buyer. The **payment** enabler facilitates **payments** for **transactions** between businesses by enabling the employees of a business registered with the **payment** enabler to direct the various phases of the **payment** process on behalf of the business for which those employees work. A super user employee, identified by the business during registration with the **payment** enabler, has the power to register other employees of the business with the **payment** enabler and to specify the privileges that the **payment** enabler should grant each employee to act on behalf of the business.

French Abstract

L'invention se rapporte a un procede permettant a deux entreprises de mener a bien une **transaction** qui inclut un paiement d'une des entreprises (l'acheteur) a une autre entreprise (le vendeur). Un facilitateur de paiement assure un service de transfert d'argent sur un reseau de noeuds informatiques, tel que l'Internet. Generalement, l'acheteur et le vendeur utilisent le service de transfert d'argent du facilitateur de paiement pour mener a bien une **transaction** qu'ils ont preparee sur le reseau informatique par l'intermediaire d'un facilitateur de **transaction** qui permet aux entreprises de passer des marches sur le reseau informatique. Lors de l'enregistrement aupres du facilitateur de paiement, un acheteur fournit generalement des informations relatives a un compte bancaire a partir duquel le vendeur doit etre **paye**. Et le vendeur fournit generalement des informations relatives a un compte bancaire destine a recevoir les fonds en provenance de l'acheteur. Le facilitateur de paiement facilite les paiements relatifs a des **transactions** entre des entreprises en permettant aux employes d'une entreprise enregistree aupres du facilitateur de paiement de diriger les diverses phases du processus de paiement pour le compte de l'entreprise pour laquelle ces employes travaillent. Un employe super-utilisateur, identifie par l'entreprise lors de l'enregistrement aupres du facilitateur de paiement, possede le pouvoir d'enregistrer d'autres employes de l'entreprise aupres du facilitateur de paiement et celui de specifier les privileges que le facilitateur de paiement doit accorder a chaque employe pour agir au nom de l'entreprise.

Abstract (Basic): WO 200201469 A2

NOVELTY - An actual **payment** from the buyer may be allowed at an agent location. The latter may be in communication with the agent computing system. The seller is informed that the actual **payment** for the **transaction** has been received at the agent location upon receiving the actual **payment** from the buyer. This permits the seller to begin shipment of the item to the buyer.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for:

(a) a method for processing a **payment** for a computerized **transaction** between a buyer and a seller for a purchase of an item

USE - For facilitating a **payment** for a computerized **transaction** between a buyer and a seller using a computer network, such as the Internet.

ADVANTAGE - Facilitates the purchase of goods and services over the Internet by consumers who either do not have credit card accounts, or choose not to provide confidential credit card account information or checking account information over the Internet.

DESCRIPTION OF DRAWING(S) - The drawing illustrates the logical operations for a buyer/consumer to select the **payment** method for computerized **transaction** in accordance with one embodiment of the present invention.

Abstract (Basic): WO 200188809 A2

NOVELTY - Employees (310) of a buyer (110) and employees (320) of a seller (120) communicate via a network (300) to participate in business-to-business **transactions** via a **transaction** facilitator (340) and a **payment** enabling server (330). Web pages and computers on

the network (150) run a web browser, while the servers provide a GUI for receiving information from the employees.

DETAILED DESCRIPTION - The facilitator serves to introduce the buyer and seller and the **payment** server completes transfer of money after **transactions** are agreed. INDEPENDENT CLAIMS are included for:

(1) a computer server

(2) a computer readable medium with instructions.

USE - Transferring money in a business-to-business **transaction** .

ADVANTAGE - Easy to use and suitable system.

DESCRIPTION OF DRAWING(S) - The drawing is a block diagram of a computer network

TITLE: Online Payments Get Personal

Wells Fargo recently acquired a stake in **Billpoint**, an online - payment technology owned by eBay, and now the bank will be processing credit card transactions and providing customer support for eBay customers. While **Billpoint** will be marketing only to eBay for now, it will soon widen its services to include areas like business-to-consumer commerce. X.com and **PayPal** have also teamed up to combine their online payment technology that centers on electronic funds transfers rather than credit card payments. While **PayPal** is now the leading payment system on eBay, the auction site will market **Billpoint** as the preferred payment option, but will allow other electronic payment services. People will be watching the auction sites, and if person-to-person payment is...

X.com, an online financial services site led by Elon Musk, will be the biggest IPO of the year, even surpassing the IPO of online grocery delivery company Webvan. X.com has some heavy hitters on its executive staff, including Bill Harris, formerly CEO of Intuit as CEO, and Michael Moritz of Sequoia Capital. X.com, like Webvan, wants to 'the first on its block' to create an Internet-accessible supermarket--in X.com's case, a market in which consumers can obtain the full range of banking, brokerage, mortgage, and credit services from a single site. Although larger commercial banks and small startups have had different results in online banking, many firms such as E*TRADE would like to work with a successful one-stop financial service site with bill paying, mortgage financing, and stock trading. Large numbers of customers will have to be attracted for the site to be successful, but X.com could have the drive and dynamism to succeed. The site now provides money-market checking accounts and Visa debit cards and has 200,000 accounts, far more than its earlier rivals, which include Telebank and WingSpan. Among successful enticements offered by X.com are free, no-minimum mutual funds managed by Barclays, and contributions of an added 0.01 percent to customers' investment in the X Premier 500 X&P Index fund. However, the greatest attraction for customers has been a **person-to-person payment** system that allows users to easily pay and accept payments from others just by providing an e-mail address.

INTERNET - E-COMMERCE

SUMMARY

* eBay and Wells Fargo announced today the launch of a new **payment** option, **Electronic Check**, to facilitate **person-to-person*** online payments.**

* **Electronic Checks** are like travelers checks and are pre-purchased by buyers.

* E-Checks provide purchasers the functionality of paper checks, with the speed. . . and chargebacks.

* This innovation is an extension of the Billpoint platform, the strategic alliance between eBay and Wells Fargo.

* **Billpoint**, the leader in **person-to-person***online*** payments**, has broad utility for facilitating a range of e-commerce transactions. This investment in the exploding online payments arena could potentially significantly enhance the. . .
